EXPERIENCE

Freelance React/Web Developer/Engineer - (Remote)

03/25 - Present

Currently working on projects on an as-needed basis, using a range of technologies described below in my previous experience (JavaScript/React/Node) and my extensive experience with WordPress, and Gutenberg/Elementor Pro editors. Projects range from UI/UX design wire frames and mockups, simple information websites to complex React/Next.js, and eCommerce sites with shopping carts and payment systems like Stripe and PayPal that include authorization accept credit cards and send out email notifications.

International Contractor, Government of Sierra Leone, West Africa
12/23 - 03/25

Lead Developer, Consultant and Instructor

- Provided instructions in **Advanced Courses in HTML, CSS, JavaScript (including ES6+), React, WordPress, and Content Management Systems (CMS)** technologies, **Git** and **Version Control**
- Developed guidelines and software training programs for employees within the department of Agricultural Science and Technology

SENIOR React / WordPress Developer, Workhuman - (Remote)
07/23 - 12/23

- Maintained existing code and implemented additional code base to support pages and post types
- Created Custom Themes and Plugins to support current codebase in a **Classic** and **Gutenberg** WP Editors
- Converted **Figma** and **Adobe XD UI Designs** into functional dynamic FrontEnd content
- Utilized **React**, TypeScript, NodeJS, in VS Code editor
- Used **Command Line** environment on a daily basis utilizing Node.js, npm/npx environment to implement **git commands** like push, pull, branch, merge, clone, and engage continuous deployment (**CI/CD**) as needed to update code branches in local and staging environments, and merged approved pull requests in production code base as necessary

SENIOR FrontEnd UI React Developer, Bank of America, New Jersey (Remote)
05/21 - 07/23

Worked in a Team environment with other Engineers and Developers collaborating on a company-wide software development process utilizing Bitbucket in Agile Scrum methodologies.

- Utilized **React**, TypeScript, NodeJS, in VS Code editor
- Wrote effective **HTML, CSS, JavaScript (ES6+)** and **React** Scripts
- Wrote React functional components utilizing react hooks (useState, useEffects, useContext) and other react techniques like react router, and **event handlers (onClick, onSubmit, onChange)**, etc.
- Converted **Figma** and **Adobe XD UI Designs** into functional dynamic FrontEnd Scripts
- Utilized **SASS/SCSS 7-1/pattern** and/or **BEM** (Block Element Modifier) as necessary
- Implemented **Flexbox, CSS Grid, and Tailwind CSS** to style components in the development phase
- Used **Command Line** environment on a daily basis utilizing Node.js, npm/npx environment to implement **git commands** like push, pull, branch, merge, clone, and engage continuous deployment (**CI/CD**) as needed to update code branches in local and staging environments, and merged approved pull requests in production code base as necessary
- Retrieved RESTful and GraphQL JSON data and consumed in React components
- Apply CRUD (Create, Read, Update/Patch, Delete) functionalities in development process via asynchronous Fetch/Axios methodologies
- Interact with SQL (MySQL, PostgreSQL) as well as NoSQL (MongoDB) data sources
- Utilized React and Browser Developer tools for Debugging as required
- Utilized Animation packages including, GSAP (GreenSock), CSS Animation and Framer Motion
- Implement Security Issues pertaining to **CORS, CSRF, XSS**, etc.
- Implement **ADA** (American with Disability Act) compliance and **WECAG** (Web Content Accessibility Guidelines (WCAG) 2.1) compliance as required

WordPress Web Developer, COMOP Organization, New Jersey (Remote)

07/2015 - 05/2021

- Maintained existing code and implemented additional code base to support pages and post types
- Created Custom Themes and Plugins to support current codebase in a **Classic** and **Gutenberg** WP Editors
- Used **React** as FrontEnd and WordPress as BackEnd in Decoupled WP Site **Headless CMS** environment
- Utilized **RESTful API** and **GraphQL** techniques to Retrieve and Manipulate **JSON** data
- Utilized **Fetch/Axios** to access external asynchronous JSON data
- Implemented **"The Loop"** and **"WP_Query"** to generate dynamic WP content
- Implemented **"wp_reset_postdata()"** function after executing any custom loop event
- Utilized **advanced WP Plugins (ACF, CPT, and WooCommerce)** to enhance the code as needed
- Integrated eCommerce Payment Systems: **Stripe, PayPal**, etc. as needed
- Designed, Created and Ran **eMail Marketing Campaigns** as necessary
- Ran **Google Analytics** and analyzed website traffic on frequent basis

Designer / Web Developer, KelschTech Organization, New Jersey

11/2013 - 07/2015

- Created Wireframes using Balsamiq Mockups software, generated the PSD Mockups using Photoshop, extracted the pertinent web assets and then converted the Mockups into HTML/CSS Static Code
- Updated and Maintained Company Website as needed
- Supervised and provided computer trainings to technical as well as non-technical employees
- Provide technical support to company employees as needed and through the On-Call System
- Used WordPress, PHP & MySQL to provide dynamic backend functionality
- Learned New Technologies including Angular, React, Laravel, Sketch and Adobe InDesign

Project Manager, BizHosting Club, New Jersey

11/2013 - 07/2015

- Coordinated projects from inception to implementation
- Hosted, Managed and provided Customer Support for Client Websites
- Assigned and supervised projects ranging from basic/personal sites to complex eCommerce sites
- Utilized OOP (Object Oriented Programming) as needed
- Wrote simple SQL Queries to SELECT, INSERT, UPDATE, DELETE & JOIN basic commands
- Utilized JavaScript, jQuery, AJAX & JSON technologies as needed
- Registered New Domains and assisted with transfer of Existing Domains
- Installed SSL Certificates for sites that required encrypted security communications
- Setup custom, domain-related Client eMails such as: sales @ domain.com, jdoe @ domain.net
- Performed testing during the development phase to ensure Cross-Browser Compatibility and Accessibility
- Used Microsoft Document Authoring tools: Word, Excel and PowerPoint for internal and external communication, and to perform slideshow presentations
- Implemented Advertising Campaigns in Google, Facebook, Twitter and other Social Networks
- Provided Customer Support through Ticket System, eMail, Phone, and Online Chat as necessary

EDUCATION & PROFESSIONAL CERTIFICATION

BS, Chemical Engineering, Penn State University, Pennsylvania

May 1987

Professional Engineering Certification,

Chemical Engineering, State of New Jersey

May 1989

Self-Taught: FrontEnd and Backend Development Technologies:

Sources: YouTube, Udemy, Scrimba, Canva, etc,

UI/UX Design

HTML

CSS

Tailwind CSS

JavaScript

ES6+,

React

TypeScript
